

Title - Pehel - 4

Medium - black stone

Size - 18"×18"lns.

Category - 3D (sculpture)

Year - jun. 2020

Price - 25,000

Pehel-4:- It is titled as the first step. Here we can see there are two feet one of which is moving upwards showing growth, success and efforts while the other feet is of those who tries to pull us backward. In between, there is a hole which symbolises the problems, issues and plotting created by others so that we can fall into it. The hole can also symbolise the temptations of life which attracts us towards themselves and make us fall from the position we are in. In that situation the other feet will also work as a tempting pressure applied on us from the outside world which forces us to stop the way forward. The linings in the whole sculpture is symbolising the positive pressure we are holding and which is helping us to move forward from every problem, suffering, pain and whatever life give us. It maybe thick, it may be thin, sometimes it's not even there. But we still need to move. To move forward and achieve the goals don't get tempt by your own success and never think that you can now rest. These were the temptations of life, the hole we can fall into and lose the race of success. To achieve something, we need to move forward.
